Professional Summary

Creative and technically skilled game designer and Unreal Engine developer with **over 5 years of hands-on experience in gameplay systems**, multiplayer mechanics, and game prototypes. Marketplace creator with **published Unreal Engine assets and prototypes**. Passionate about designing engaging gameplay experiences and translating creative ideas into functional game systems.

Education

Technical University of Dortmund — Dortmund, Germany

BSc Computer Science 2014 – 2025

- Relevant focus areas: Game development, Multiplayer networking, Software engineering

Nihon University — Tokyo, Japan

Exchange year, Economics 2019 – 2020

Immanuel Kant Gymnasium Dortmund — Dortmund, Germany

High School Diploma 2006 – 2014

Technical Skills

Game Development

Unreal Engine (5+ years), UE C++ Programming, Gameplay Systems Development, Multiplayer Networking / Netcode, UI Systems and Game Interfaces, Animation Integration, Gameplay Prototyping

Creative Tools

Blender, Adobe Photoshop, Gravit Designer, Audacity

Additional Game Development Tools

Unity (basic experience), Sound design and editing, VFX implementation, Game UI design

Game Development Experience

Independent Game Developer / Unreal Engine Creator (2019 – Present)

- Designed and developed multiple gameplay prototypes using Unreal Engine
- Implemented gameplay systems using Unreal Engine C++ and Blueprint scripting, character animation systems, VFX, UI and sound design
- Built multiplayer networking systems, implementing replication logic and gameplay synchronization for real-time scenarios
- Published game prototypes and animation assets on the Unreal Engine Marketplace (>500 downloads), demonstrating production-ready design and technical implementation
- Created full gameplay pipelines including character animation integration, UI implementation, and gameplay feedback systems
- Designed assets with usability and integration in mind for other developers
- Maintained and updated products based on user feedback

Local Multiplayer Game Development Project (2024)

- Collaborated in a team of ten to create a local multiplayer version of the award-winning strategy board game Nova Luna
- Responsible for core gameplay functionality and game AI

Online Multiplayer Game Development Project (2023)

- Led a team of four to design and develop a multiplayer game prototype
- Implemented gameplay features and player interaction mechanics within the Unity engine
- Contributed to gameplay iteration and system testing to improve responsiveness and user experience

Languages

Fluent in German (Native) and English (Bilingual proficiency). Professional working proficiency in Japanese.
