Fabian Weiß

UNREAL ENGINE DEVELOPER | GAMEPLAY PROGRAMMER

Dortmund, Germany | wfabian.dev@gmail.com | Developer Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Unreal Engine developer and independent game creator with **6+ years of hands-on experience** building gameplay prototypes and systems. Experienced with **Unreal Engine C++, Blueprint scripting, multiplayer network replication and game system design** and implementation. Solo-developed and published complete game demos, and created Unreal Engine Marketplace assets with more than 1000 sales. Combines technical implementation with practical game-design, UI and animation-integration experience. Well versed in traditional programming as well as agentic coding workflows.

TECHNICAL SKILLS

Programming & Engine: Unreal Engine 5, Unreal Engine C++, Blueprint scripting, Unity (basic experience)
Gameplay & Networking: Gameplay systems, gameplay prototyping, multiplayer networking, replication logic, gameplay synchronization
Game Integration: UI systems and UMG, character animation integration, VFX implementation, sound design and editing
Creative Tools: Blender, Adobe Photoshop, Gravit Designer, Audacity, Cascadeur

EXPERIENCE

Independent Game Developer / Unreal Engine Creator | *2019–Present*

- Designed and developed multiple gameplay prototypes in Unreal Engine using C++ and Blueprint scripting.
- Implemented gameplay systems and integrated character animation, UI, visual effects and sound.
- Built multiplayer networking functionality, including replication logic and gameplay synchronization for real-time scenarios.
- Created and published Unreal Engine game prototypes and animation assets; published products have received more than 500 downloads.
- Designed reusable assets with usability and integration in mind, and maintained and updated products in response to user feedback.

SELECTED PROJECTS

Bound for the West — Solo-developed Unreal Engine 5 action RPG demo
Designed the game and combat system, integrated third-party-quality assets, and developed complex boss-fight behaviour. Published as a playable Windows demo. Project

Pet Inc. Zoo — Solo-developed zoo-management game
Developed and published a cozy management-game prototype; portfolio work includes game systems, UI and player feedback, visuals, sound and environment. Project

Grappling Hook Game Prototype
Created a physics-based movement prototype featuring character animations, visual effects and multiplayer-ready functionality. Project

Unreal Engine Marketplace Assets
Created and published animation and UI assets, including levitation/floating animations, UI feedback effects, greatsword combat animations and item/consumable animations. Project

COLLABORATIVE PROJECTS

Local Multiplayer Game Development Project | 2024
Collaborated in a ten-person team on a local multiplayer adaptation of the strategy board game Nova Luna; responsible for core gameplay functionality and game AI.

Online Multiplayer Game Development Project | 2023
Led a four-person team developing a multiplayer game prototype; implemented gameplay features and player-interaction mechanics in Unity, and contributed to iteration and system testing.

EDUCATION

Technical University of Dortmund | B.Sc. Computer Science | 2014–2025
Relevant focus areas: game development, multiplayer networking and software engineering.
Nihon University, Tokyo, Japan | Exchange Year, Economics | 2019–2020
Immanuel Kant Gymnasium, Dortmund, Germany | High School Diploma | 2006–2014

LANGUAGES

German (native) | **English** (bilingual proficiency) | **Japanese** (professional working proficiency)
